Note:
The information depicted on this map reflects the best available published data at the time of its creation. The level of accuracy is appropriate for comprehensive planning uses. However, the accuracy of information depicted here may be insufficient for site-specific uses, and it is recommended that additional sites-specific analysis be conducted to verify or modify what is shown here.

Islands without Future Land Use classification on this map are (1) too small to develop, or (2) in private, town, state or federal ownership and dedicated uses that preclude development.

A large format version of this map is available for public review at the Town Office.

Produced by the Greater Portland Council of Governments, 2005.
