

Appendix 12 Undeveloped and Developed Land in Harpswell

In order to determine how much open space Harpswell has, the land town can be divided between developed and undeveloped land. **Developed** property is land with residential or commercial buildings and roadways on it. **Undeveloped** land can be divided between land which is protected from development as the result of its ownership and the remainder of the undeveloped land. Some of the remaining land may be difficult or impossible to develop because it is too steep, wet or rocky. The remaining undeveloped land can be used for development in the future or preserved as open space. The residents of Harpswell must decide how much of this remaining undeveloped land should be developed and how much should remain as open space.

Percentage of Harpswell Land Developed and Undeveloped
